

1. Problem based learning for Business professionals

NFQ: Level 8, ECTS: 6

Duration: 10 weeks

Distance learning

Note a pilot of this module will be run for free (without the award of ECTS) on Monday 25th April 2016

Course background

The objective of the module is to allow companies to structure informal learning that takes place within their organisation. This will be done aligning informal learning approaches with problems companies face using a technique known as problem based learning.

Problem based learning has been successfully applied in training doctors and nurses to apply what they have learned to real life problems through a 9 stage process. This method will be transferred to companies where the individual learner will identify a problem in the organisation and apply the process to enable them to solve the problem within the organisation. The learner will be guided through the process with learning material, a tutor, a network of learners and real life case studies.

The learner will develop a range of skills in problem solving, management, communication and team work.

Learning outcomes

The module aims to develop a motivated student which thinks critically and is self directed and proactive in terms of problem solving. The module has a number of objectives

- With peers and superiors apply the relevant criteria to select a problem suitable for problem based learning for problems faced by business professionals.
- Explain the roles of PBL and effectively collaborate with these.
- Complete each stage of the PBL process to address the identified PBL problem.

Funded by the
Erasmus+ Programme
of the European Union

- Search for and identify the relevant knowledge to enable them to complete the PBL process for a problem faced by business professionals.
- Apply this knowledge to address the identified problem.
- Use the relevant scaffolds to assist the completion of the PBL process.
- Identify opportunities for the reapplication of the PBL process in their workplace
- Demonstrate management skills.
- Reflect on the effectiveness of their learning approach.

Delivery

The module is being offered through Kemmy Business School in the University of Limerick. It will be delivered primarily online. Video lectures, text based material and slides will be made available through an PBL ICT platform. The platform will guide the learner through the PBL process and will be allow to record their findings at each stage. In addition, the learner can access case studies of similar solved problems as well as a peer group of learners.

The learner will attend a 2hour induction and registration on Monday 25th April. The learner will be required to attend a 1hour tutorial with the tutor per week (online) and conduct 8 hours of self-directed learning using the material provided to solve the company problem

Content

The content of the module is centred around selecting a problem for PBL, the PBL process and developing self motivated (self directed) learners.

- What is problem based learning
- Becoming a self directed learner in PBL
- Selecting a problem for PBL
- The roles in PBL and small group learning
- The PBL process
- Collaborating and completing the PBL process - Clarifying terms, Defining the problem, Brainstorming, Developing learning objectives, Self study and information literacy (how to find the information to solve your problem), Sythesising a solution, Reflecting on PBL and reapplying your learning
- Using scaffolds and supports

Entry requirements

The learners will be required to hold a leaving cert qualification.

Fees

The normal cost of running the module is €200 however between April and July this course will be available for free (without the award of ECTS)

Programme structure

The module will be run over 10 weeks. It will be delivered completely on line to facilitate the demands companies face in terms of releasing staff for training.

Funded by the
Erasmus+ Programme
of the European Union

The learner will be required to attend a 1 hour tutorial and complete 8 hours of independent study per week. The learner will be able to access the tutor during this independent study as required. Weekly assignments will be submitted to the tutor

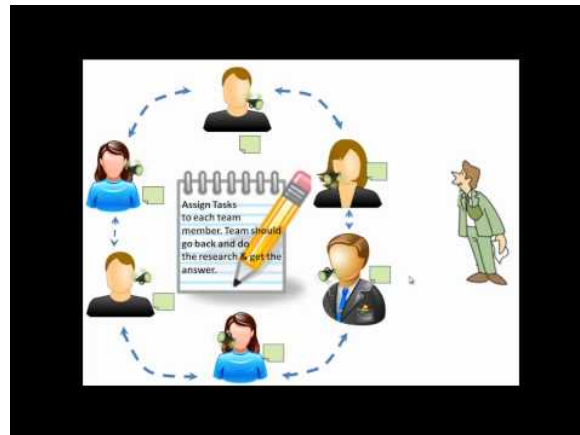

How to apply

Please contact Dr. Emma O'Brien at emma.obrien@ul.ie or 0861077414. Students will be required to register their interest before **Thursday 21st April at 5pm.**

Funded by the
Erasmus+ Programme
of the European Union

2. Facilitating problem based learning

Course Overview	Duration: 10 weeks Distance learning
Background	<p>The objective of the module is to allow companies to structure informal learning that takes place within their organisation. This will be done aligning informal learning approaches with problems companies face using a technique known as problem based learning.</p> <p>The course will teach managers and trainers in SMEs the skills required to facilitate and deliver PBL in their organisation. The technique collaborates with learners to identify a problem in their organisation. The facilitator will guide the learner to assist them to construct the knowledge they require to solve the problem</p> <p>The learner will develop a range of skills in facilitation, critical thinking problem solving, management, communication and team work.</p>
Learning Outcomes	<p>The module aims to develop a student which uses a structured approach to mentor learners in companies to develop the knowledge they require to address an in-company problem. The student will be able to:</p> <ul style="list-style-type: none"> • Apply learning culture theories and practices to develop an open learning culture in their organization • Collaborate with learners to identify a problem in their organization • Support learners in completing each stage of the PBL process to address the identified PBL problem. • Support learners to become self directed by mentoring them to search for and identify the relevant knowledge to enable them to complete the PBL process for a problem faced by business professionals. • Facilitate the problem based learning process • Facilitate a brainstorming session. • Demonstrate an awareness of a range of issues that may occur during the PBL process for example motivating students, resolving team conflicts, developing self directed learners

	<ul style="list-style-type: none"> • Reflect on the effectiveness of their facilitation and mentoring approach and make suggestions for further improvements
Delivery	<p>The module will be delivered primarily online. Video lectures, text based material and slides will be made available through an PBL ICT platform. The platform will illustrate sample solved problems and allow the learners to collaborate with peer learners.</p> <p>The learner will attend a 2hour induction and registration on Monday 25th April. The learner will be required to attend a 1hour tutorial with the tutor per week (online) and conduct 8 hours of sel- directed learning using the material provided to solve the company problem</p>
Content	<p>The content of the module is centred around preparing the organisation for PBL and implementing PBL approach in the learners organisation</p> <ul style="list-style-type: none"> • What is problem based learning • Creating a culture of learning in a company • How to develop self directed learners • Selecting a problem for PBL for technology professionals • How to support the roles in PBL • How to support the PBL process (includes facilitation, brainstorming and guiding self directed learners) • Assessing problem based learning • Reflective learning
Entry requirements	The learners will be required to hold a leaving cert qualification.
Fee	Between April and July this course will be available for free (without the award of ECTS)
